		31 S2*10A Assign 10A for Pax1/Seg1	

Excess baggage

Any items of baggage weighing more than 32 kg will not be processed at the desk, but need to be checked in separately as cargo.

Segment Cost and cancellation

Segments with status codes HX, UC, NO, UN or other rejected segments status, that remain on the PNR and are not cancelled at least 36 hours prior to departure, result in unproductive cost. Active queue monitoring and PNR servicing by you the travel agent can help us to keep this under control. Emirates can assist agencies by providing them an automated tool to remove such segments to reduce the GDS wastage. Please contact your local Emirates office to get more information.

Speculative Names and Test bookings

Test or speculative bookings using Emirates live inventory are considered as abusive practice. Examples include TEST/MR, MOUSE/MR, PASSENGER/MR, etc.

For cases where test bookings have to be made for training purpose, please ask your GDS system provider to enable their test environment. Avoid blocking inventory for fare quote purposes as this can be achieved by the use of ghost segments or an equivalent entry through your booking system.

Duplicates

Duplicate segment are when multiple segments are booked to secure space across flights/date class, for the same passenger or multiple bookings are made for the same passenger via different booking locations. This blocks valuable flight inventory & failure to cancel space in time results in loss of revenue & wastage cost to Air India.
